## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 18, 2005 has been entered.

### ***Drawings***

The replacement drawing sheets have been received and the objections to the drawings are therefore withdrawn.

### ***Specification***

The amended title of the invention is found sufficiently descriptive and approved. The objection is therefore withdrawn.

### ***Allowable Subject Matter***

Claims 1-4, 6-12 and 14-40 are allowed.

The following is an examiner's statement of reasons for allowance:.

With regard to newly amended independent claims 1 and 9, Applicant has included the underlined features: "a three-dimensional image pickup part that includes a projecting part that projects along a direction of an optical axis, a first image pickup part that picks up an intensity image and a projection pattern image deflected from the direction of the optical axis of the projecting part by a half-mirror, and a second image pickup part that picks up the projection pattern." The applied combination of Kang and Perona combination do not teach or fairly suggest this method of projecting and deflecting image data and none of the found prior art has been found to remedy this deficiency. Therefore the independent claims 1 and 9 and all of their respective subsequent claims are found to be allowable as well.

With regard to newly amended independent claims 17, 27 and 37-40, Applicant has added limitations involving the projection of coded light as well as the reading and decoding of that coded light and using that coded information to determine the distance from the light projection to the object. The applies combination of Bunke and Saund does not teach or fairly suggest such practice, and none of the found prior art has been found to remedy this deficiency. Therefore the independent claims 27, 37-40 and their respective dependent claims are found to be allowably

This allowable subject matter taken along with the discussion and arguments found in the previous office actions and responses provide the reasons for indication of allowable subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
